Middle Plantation Civic League Safety Alert

It was brought to my attention this afternoon that early Tuesday morning a member of our Civic League was awakened by their security alarm going off. When the police arrived and together they did a thorough check of the property, it was discovered that the outside garage door had been tampered with which set off the alarm. It is believed that the alarm scared away the person. However, it is our understanding that another neighbor had a similar occurrence around the same time with an unlocked car and became a victim having items stolen from the vehicle.

Please remember to lock your vehicles, never leave purses/computers/cell phones/wallets/etc. in open view in a vehicle and keep exterior doors closed and locked especially after dark. While we hope this does not happen to others, we need to all do our part to not "invite" criminal activity by becoming known as a neighborhood that is easy prey. We may not be able to keep these persons from trying, but we can sure make it harder for them, which will hopefully send them to another neighborhood or other area of the City.
